ZENON™ Z12 FOAM

FOAM LINING
FOR DUST PROTECTION

**VALUE IN SAFETY & COMFORT
PLUS DUST PROTECTION**

- Foam padding covers all sides of the eye, providing 360° protection against dust and other airborne debris
- Lightweight design provides all day comfort
- Anti-Fog coating and vented frame are standard on all models

FOAM LINING PROTECTS AGAINST DEBRIS & AIRBORNE PARTICLES

MEETS ANSI
Z87.1+

Zenon™ Z12 Foam by Bouton® Optical

Dust and other airborne particles can cause eye irritation, vision impairment, and other eye injuries, creating costly worker downtime. Bouton® Optical Zenon™ Z12 Foam provides an effective yet economical solution by adding a foam liner to one of the most popular styles of safety glasses to help prevent these injuries. The foam padding goes all the way around the lens to provide 360° protection, and also acts as a brow guard to keep perspiration out of the worker's eyes. Anti-Fog coating and vented design help reduce lens fogging. Applications where these hazards are present include road construction, carpentry, masonry, sanding, sawing, and landscaping.

THE RIGHT FIT & LENSES FOR YOUR WORKING ENVIRONMENT

FEATURES

Lightweight, rimless design adds comfort for all day wear

Universal size fits most workers

Foam padding design forms a seal around the eye to help keep out dust and airborne particles, and perspiration

Small cell foam is more durable than other economical options

Thin, flexible temples provide a secure fit without uncomfortable pressure points

Anti-Fog coating and vented frame are standard on all models

9.5 base curve lens provides wraparound protection that does not distort vision

LENS OPTIONS FOR YOUR ENVIRONMENT

Bouton® Optical provides the right lenses for your working environment. We start with Anti-Scratch and Anti-Fog as a standard on many of our glasses. For the Bouton® Zenon™ Z12 Foam, the following lens tints are available:

CLEAR LENSES

Provide 90% visible light transmission (VLT), ideal for indoor workers and low light conditions

GRAY LENSES

Provide 12% VLT, significantly reducing the sun's glare and ideal for outdoor workers

INDOOR/OUTDOOR LENSES

Provide 60% VLT, reducing pupil adjustment time when transitioning between indoor and outdoor work

After protection, comfort is the second most critical component for PPE. With protective eyewear, pressure points and blurred or distorted vision are among other variables that could lead to loss of concentration and productivity, as well as frequent removal. Bouton® Zenon™ Z12 Foam provides those extra features that make the difference. **Bouton® Optical: safety glasses workers want to wear.**
