HEAD PROTECTION

Protecting Hands

Up to 30 percent of hand injuries are attributed to fit, wear or simply the wrong type of glove for the hazard. PIP® believes it can help eliminate hand injuries on the job. Caiman® and Ironcat® welding gloves by PIP® are specifically designed for the unique heat shielding, dexterity and protection demands of Stick, MIG and TIG welding.

Safety Products You Can Trust

Over the last 10 years, PIP® has grown its product offering in personal protective equipment to deliver head-to-toe protection. Today, in addition to knit gloves and sleeves, we manufacture hard hats, face shields, ear muffs, ear plugs and first aid products.

Welding
Safety

KEY TO SAFETY IN WELDING

THE KEY TO INJURY REDUCTION IS NOT JUST PRODUCT, IT'S UNDERSTANDING APPLICATIONS SO THAT THE RIGHT SAFETY PRODUCT IS USED.

Welding is inherently dangerous. Gas, flame, sparks, blinding light – nothing can be left to chance.

PIP® offers the right product specifically designed to help protect professional welders. Tailored to work with the different types of welding.

Hand & Arm Protection

CHOOSING THE RIGHT PROTECTION IS ESSENTIAL TO NOT ONLY MINIMIZING SAFETY RISKS BUT MAXIMIZING WORKER PRODUCTIVITY AND THE QUALITY OF THE WELD.

IRONCAT® welding gloves and sleeves are specifically designed for the unique heat shielding, dexterity, tactility and protection demands of all welding and metal fabrication applications.

STICK

Maximum Heat Protection and Durability

MIG

Enhanced Dexterity and Comfort

TIG

Extreme Precision and Durability

SLEEVES

Extended Arm Protection

Body Protection

PROFESSIONAL WELDERS ARE CONSTANTLY AT RISK DUE TO WELDING EQUIPMENT THAT PUTS OUT HEAT, SPARKS, METAL AND FUMES.

Selecting the proper PPE depends on the hazard, where you work, how often you perform the task, jobsite requirements and ultimately what you are comfortable with.
